

# Seeking participants for research study on Peripheral Neuropathy

Do you know that nerves are present in your cornea? The National Neuroscience Institute is conducting a study to evaluate corneal nerve changes and biomarkers in patients with peripheral neuropathy.

## What the study involves

- 1 visit to Singapore National Eye Centre
- Questionnaires and simple neurological assessment
- Corneal nerve imaging
- Tears and blood collection

### Study Locations

- Tan Tock Seng Hospital, National Neuroscience Institute (NNI)
- Singapore National Eye Centre (SNEC)

### Transport Reimbursement

- Provided

## Are you eligible?

- Age  $\geq$  21 years old
- Neuropathy related to **diabetes** or **chronic inflammatory demyelinating polyneuropathy (CIDP)**
- No previous corneal abnormalities, recent eye surgery or infection
- Not pregnant

## Contact Details

For more details or to take part in the study, please contact our research coordinator:
