

LYNCH SYNDROME

MORE THAN JUST THE PATIENT

GP LUNCH TIME CASE DISCUSSION

29 APRIL 2022, FRIDAY

1PM TO 2PM

1 CME point will be accredited

Lynch syndrome represents an increased genetic predisposition to colorectal cancer and other associated cancers. Ascertaining if a patient with colorectal cancer has underlying Lynch syndrome will enable clinicians to curate a tailored management for these patients and their families. Join our panel of doctors as we discuss a patient with colorectal cancer and how genetic testing helped the patient and family members in their management.

Discussion Topics

Lynch syndrome 101 for the family physician
Cancer risk and what to look out for?
Lynch syndrome: a surgical perspective

Speakers

Dr Chiang Jian Bang
Consultant
Division of Medical
Oncology

Dr Rose Fok
Associate Consultant
Family Physician
Division of Medical
Oncology
